Z

that the completion of the boundaries of the Counties of Bourke & Grant should be entrusted to Mr Surveyor Hoddle, and that an Assistant with the customary Equipment or Allowance and complement of Men should be appointed to aid him. whilst the boundary of the County of Normanby might in like manner be completed by Mr Pickering, And in your letter of the 22d ultimo No 298. a similar arrangement is proposed altho' apparently differing slightly in detail,

Port Phillip

From these suggestions as well as from communications which the Governor has had with Mr La Trobe His Excellency is led to believe that there will be no difficulty in fixing proper boundaries for the three Counties in the Port Phillip District and His Excellency therefore feels that nothing more is necessary in respect to them than to authorise such additional expense as Mr Hoddle with the sanction of Mr La Trobe may find it necessary to incur."

A Surveying party must also be fitted out as soon as possible for defining the boundaries of the County of Auckland and for the performance of such other duties as may be req[d] in the said County. In your letter No 228. you propose that the conduct of this party shd be entrusted to Mr Townsend. but as that Gent[n] is now to join the Exped[n] to Port Sydney some other Officer must of course be selected for this duty and it seems desirable to His Excell[y]. that the person so selected should have the assistance of a Junior officer (if one can be spared.) as suggested in your subsequent letter No 298. As however the Co[y] of Auckland and indeed the whole of the Manawow District is now fully occupied by Squatters. His Excellency cannot but hope that this Survey Party may be able to proceed with a lighter equipment than what Surveyors have hitherto been accustomed to encumber themselves with, and as it is now very difficult to procure well behaved convicts His Excellency wd prefer that free men should be employed for the Service

A similar provision must be made for defining the boundaries of the County of Stanley. As it appears from your letter that there are two Surveyors (Messrs Wade & Warner) disposable in the Moreton Bay District the arrangement necessary for this purpose will not be difficult. His Excellency will not object to the employment of Messrs Wade & Warner in laying out the boundaries of the County of Stanley, if you think it desirable that Mr Burnett should continue on the work on which he is now engaged, viz the Survey of the Dividing Range and as soon as the County is laid out those Officers may be employed in assisting the respective Commissioners of the Moreton Bay ~~District~~ and Darling Downs Districts in defining the boundaries of Runs. and making rough Maps of their Districts

2d. As to the Survey of Runs beyond the limits

In your letter on this subject No 230 of the 6 August, you have proposed various queries as to the details of the measures necessary under this head, It is believed that the Instructions which I have now the honor to communicate to you will be a sufficient reply to these queries or at least to such of them as are material. The measures already authorised at Port Phillip and Moreton Bay will His Excellency hopes lay the foundation of such a system as may suffice in those Districts for the occupation of pasture Land and for the sale of Homesteads on the plan which has been sanctioned by Her Majesty's Government. The exact extent in which a Surveyor is to attend the respective Commissioners in Districts where it may be necessary to have separate Individuals filling these two Offices cannot His Excellency thinks as yet be defined, As in most other matters time alone can shew which will be the best arrangement but though difficulties may exist in the first instance His Excellency has little doubt that with proper management and good feeling they may be overcome.

From the nature of his Employment the Commissioner must be the Chief Officer in the District but there is no reason why the Commissioner should not be a Surveyor.

Every Homestead must be accurately surveyed in order that it may be described for deed, And it is very desirable that there should be in every Homestead at least one point fixed trigonometrically, But the same degree of accuracy is not necessary in respect to the boundaries of Runs. It is necessary indeed that the boundaries should be fixed and so defined that disputes in respect of them may be as far as possible avoided but it scarcely seems necessary that
