SCALE OF CHAINS

I hereby certify that I in person made, and on the tenth day of January 1879 completed the survey represented by this plan, on which plan are shown the bearings and lengths of the lines surveyed by me; that in making such survey I used theodolite in accurate adjustment, and a chain of Imperial standard length; that I commenced this survey at the point marked A on this plan, and used as the basis of bearings the line marked AB thereon; that with the theodolite I observed all the angles formed by the junctions or intersections of the aforesaid surveyed lines, and that the field notes or copy thereof (attached to this plan) contain a true record of the actual results of observations made with the theodolite and measurements made with the chain, also that the whole of the work was done in accordance with the requirements of the Land Act and the regulations thereunder, and with the instructions now in force, issued to Surveyors, and I hereby declare that the above certificate is true in every particular.
